A letter of invitation for participation in science conferention
STUDKON- Science and students

Respected,

Since the Student's Union of Faculty of Philoosophy in Niš is celebrating 25th jubilee, we are organising the student's science conference named STUDCON, which will be held on November 13th and 14th 2015 in Niš. It is planned to last for two days, therefore, the work will be organised in sections, at least two of them, one regarding social-human sciences and the other literary-linguistics disciplines, or in more sections, depending on number of applicants. The anthology of this conference will be published by the Faculty of Philosophy in Niš.

Through this project, the organisers intend to establish long lasting relationship with related faculties, furthermore, it is a great opportunity for students to publish their scientific achievements.

The Faculty of Philosophy has recently organised a number of science conferences, so the Sudents' Union of Faculty of Philosophy wants to start a tradition and justify the name of the faculty. The basic idea is to collect work from various science disciplines in order to organise as many sections as possible.

We want to inform you and invite you to participate in science conferention and furthermore, to contribute to its success by informing your students. We expect from you to send your application with the title of the paper and short resume, the deadline is August 28th 2015. All of the papers need to have the recommendations from mentor.

Best regards,

Organising Committee of science conference
STUDKON- science and students
